SUMMARY

Software developer with 4+ years of experience. Currently building a production microservices platform (8 services, gRPC, RabbitMQ, AWS ECS) serving temples across India. Backend-focused with Node.js and TypeScript; also deliver frontend work in React and Next.js.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL

Backend: Node.js, Express.js, NestJS, Spring Boot, gRPC, REST APIs, WebSockets, RabbitMQ

Frontend: React.js, Next.js, Remix, Redux Toolkit, Zustand, Tailwind CSS

Databases: PostgreSQL, Prisma ORM, MongoDB, MySQL, Redis

Infrastructure: Docker, AWS (ECS, S3, CloudFront, SES, Secrets Manager), GitHub Actions, CI/CD

Concepts: Microservices, Event-Driven Architecture, RBAC, System Design, JWT (RS256/HS256), API Gateway Pattern, OpenTelemetry

EXPERIENCE

Software Developer | Ek Ishwar, Mumbai

Nov 2025 - Present

- Designed and deployed 8 independent Node.js/TypeScript microservices (auth, user-profile, temple, puja-booking, payment, invoice, notification, API gateway), each with its own Prisma schema, Docker container, and PostgreSQL database.
- Implemented gRPC for synchronous inter-service communication using RS256-signed internal JWTs, and RabbitMQ topic exchanges with dead-letter queues for asynchronous workflows including refund processing and cache invalidation.
- Engineered the API gateway as the single entry point, enforcing permission-based authorization across 100+ permissions and 7 role types, with Redis-cached permission lookups reducing repeated auth calls.
- Integrated Razorpay for the complete payment lifecycle: order creation, webhook verification, refund processing via a RabbitMQ consumer with DLQ and correlation IDs, and automated PDF invoice generation using Puppeteer.
- Shipped the consumer-facing Next.js app (static export to S3 + CloudFront) and a React admin dashboard (Vite + React Router) with 20+ management modules for temples, bookings, payments, and user KYC.
- Containerized all 8 services with multi-stage Docker builds, deployed to AWS ECS with Cloud Map service discovery and AWS Secrets Manager for configuration injection.

Software Developer | UVH Tech (Veefin), Mumbai

Jul 2024 - May 2025

- Created a multilingual React application using Remix, React Router v7, and Tailwind CSS with loader-to-component streaming for parallel data fetching.
- Built backend services in Java Spring Boot and Node.js — DTO-based APIs and JWT authentication endpoints consumed by 3+ platform services.
- Implemented a JWT-authenticated login system with secure session handling and Express.js middleware for request validation and error handling.
- Achieved 94% frontend test coverage using Vitest across all critical user flows.
- Collaborated in Agile sprints with a cross-functional team of 8 developers, consistently delivering features on schedule.

Software Developer | Paktolus, Mumbai

Dec 2022 - Dec 2023

- Migrated a monolithic insurance platform to NestJS microservices with PostgreSQL, enabling 4 teams to deploy independently.
- Designed REST APIs and built a reusable Node.js SDK adopted by 5+ partner companies for quote integrations, cutting partner onboarding from weeks to days.
- Integrated Google Maps API for auto-suggest address input, improving form completion accuracy for end users.
- Facilitated technical discussions with 5+ partner companies to design standardized quote request-response structures for seamless integration.
- Optimized React components using custom hooks and Context API, eliminating unnecessary re-renders in data-heavy views.

Software Developer | Bysness, Mumbai

Aug 2022 - Nov 2022

- Built a React + Redux analytics dashboard with Recharts visualizations for migration insights.
- Implemented a WebSocket-based notification system with Node.js, enabling real-time updates for 50+ concurrent users.
- Added rich-text editor and transcript search features, improving information retrieval across the platform.

Product Engineer | Moofwd Technologies, Mumbai

Jun 2022 - Aug 2022

- Developed event and notification modules using Strapi headless CMS.
- Built custom plugins and integrations tailored to client-specific requirements.

Software Developer | Constbase, Mumbai

Dec 2021 - Jun 2022

- Expanded alerting and reporting modules with React, Redux, and Node.js for a job portal platform.
- Optimized the resume-building feature, reducing PDF generation time for end users.

Web Developer | Freelancer, Mumbai

Jan 2021 - Nov 2021

- Delivered multiple web applications using React, Node.js, and MongoDB for clients across 4 industries.
- Managed full project lifecycles from development to deployment, handling both frontend and backend.

PROJECTS

3D Interactive Portfolio — React Three Fiber, TypeScript, Drei sanjeev-umar.github.io/sanjeev-portfolio

EDUCATION

Bachelor of Science, Information Technology — **Mumbai University**

2015 - 2018
